

PRESS RELEASE

For Immediate Release

Contact: Sandy McDonald, Deputy County Administrator 304-728-3284

The County Commission of Jefferson County will be launching their new Modern Citizen Experience initiative by adding text notifications on May 15, 2017.

The Commission believes that residents and visitors will be able to keep up with the day to day business conducted by the County Commission by offering notices of regular meetings, special sessions, work sessions and announcements via text messaging. This will allow people to know when the next County Commission meeting is. A link to the agenda or information regarding the meeting will be added to the text message for you to review.

Text jccalerts to 33222 to join. An Opt Out Message will be added.

For questions or further information regarding the text notifications, contact IT Support Specialist Russ Burgess at 304-728-5605 or the County Commission office at 304-728-3284.
