Photos by Brandon Vallee, JCHSEM

Jefferson County EOC was activated throughout the exercise to support all of the participants and to manage information and resources. Communications were achieved using SIRN radios, Amateur Radio, HSIN Adobe Connect Chat Room, NIXLE, ETEAM, and WebEOC.

Jefferson County Department of Health set up a POD at Jefferson County High School to practice the public health capabilities. Additionally, they achieved their closed POD capabilities by administering “drugs” (skittles) to the staff at the EOC and the Emergency Communications Center.

The Salvation Army brought lunch for the EOC participants and Tom Williams participated briefly in the Mass Care ESF.

WVU Healthcare, Jefferson Medical Center participated by setting up and practicing their Decontamination capability, as well as activating their Incident Command Center for the exercise.

Shepherd University provided “victims” to be decontaminated at the hospital. The Eastern Panhandle Transit Authority provided transportation for the student volunteers.

JCHSEM wishes to acknowledge and thank all volunteers and agencies that participated in this annual exercise requirement!

## L-146 Homeland Security Exercise and Training Course (HSEEP) to be taught in Kearneysville on Oct. 7/8

The L-146 Homeland Security Exercise and Training Course (HSEEP) will be taught on October 7/8 at the Jefferson County Maintenance Department Meeting Room from 0800-1700 daily. Lunch will be provided. This course will be taught by Greg Fuller and Jerry Beckett for WV Division of Homeland Security and Emergency Management.

The two-day period of instruction is for those individuals that are directly involved in the planning, design and evaluation of training exercises. The intermediate-level training course incorporates exercise guidance and best practices from the HSEEP Volumes. It is an interactive course that allows participants to share personal lessons learned and best practices while gaining practical experience. In addition to the instructor-led course presentations, the course includes small group activities; group discussions; introductions to HSEEP; related initiatives such as supporting technology; and capabilities-based planning. This approach provides participants with hands-on experience that readily translates to real-world exercise responsibilities. Activities include creating exercise documentation, conducting planning conferences and briefings, and practicing exercise evaluation.

Prerequisites for this course include:
