# Overview

This document constitutes the Jefferson County Capital Improvement Plan for Fiscal Year 2011. It consists broadly of two categories, those eligible for capital funding as it relates to Impact Fees and those ineligible for such funding. The only entity in the latter category is the County Commission. For the entities in the former group, their names and their associated impact fee category are indicated below (impact fee categories noted in square brackets):

- Jefferson County Board of Education [School]
- Sheriff of Jefferson County [Law Enforcement]
- Jefferson County Parks & Recreation Commission [Parks and Recreation]
- Bakerton Fire Company [Fire & EMS]
- Blue Ridge Fire Company 9[Fire & EMS]
- Citizens Fire Company [Fire & EMS]
- Friendship Fire Company [Fire & EMS]
- Independent Fire Company [Fire & EMS]
- Jefferson County Emergency Services Agency [Fire & EMS]
- Jefferson County Fire and Rescue Association [Fire & EMS]
- Middleway Fire Company [Fire & EMS]
- Shepherdstown Fire Company [Fire & EMS]

(The latter 9 entities are presented in alphabetical order)

The total funding request for all projects over the upcoming fiscal year as well as the next five outlying years is \$103,282,320 (up from \$85,327,530 in FY 2010). Of this amount, \$12,519,082 represents the funding requests for FY 2011 (in FY 2010 it was \$8,690,514).

# Authority

Pursuant to §7-20-6 counties which have enabled impact fees must maintain a Capital Improvement Plan. Only projects listed on this CIP are eligible for funding by impact fees (either in whole or in part). Whether a project may be wholly or only partially funded depends upon whether the project is exclusively needed due to new growth or is only partially required due to conditions of new growth (see §7-20-3 (h) and (i) for definitions of "proportionate share" and "reasonable benefit").

The requirement for a yearly capital improvement plan, and the identification of fee fundable projects is outlined in County Ordinance 2003-13(C) *et seq.* 

One of the tasks of the Impact Fee Coordinator is to identify projects from the Capital Improvement Plan which are eligible for funding by Impact Fees (c.f. Ordinance 2003-16(A)(2)(b).

# Changes in FY 2011

In FY 2010 the County Commission moved to change the definition of a capital project. The new definition states that the total cost of a project must be at minimum \$10,000 (up from \$5,000). The expected lifetime of the capital item remains unchanged at 3 years.

# **Summary of Priority One Projects**

Table 1 lists all priority one projects (described as Urgent/Mandatory on CIP Form 2) from entities for which impact fees are collected. Not all of these projects are eligible for funding by impact fees, but it is important to note that these projects have been described by their respective entities as having urgent/mandatory funding needs.

# **Summary of Impact Fee Fundable Projects**

The projects listed in Table 1 which are eligible for funding, either in whole or in part, by impact fees are listed in Tables 2 and 3. Table 2 includes projects from all entities while Table 3 is a subset of only those entities eligible for funding from the Fire/EMS impact fee account. Table 3 was requested by the fire chiefs and presidents from the county fire companies. The order that companies are listed in Table 3 was generated by the *natural order* of the underlying CIP database and does not represent any sense of prioritization by the Impact Fee Coordinator nor the Department of Capital Planning and Management.

# Table 3. FY 2011 Impact Fee Fundable Projects - All Priorities

# **Impact Fee Coordinator's Notes**

The divided sections which follow include the submitted CIP Form 1 (Agency/Department/Office Summary) for each entity as well as the individual CIP Form 2 documents (Annual and Five Year Project Request and Justification) which detail each project listed on an entity's CIP Form 1. Any supplementary documentation is included with the appropriate CIP Form 2.

Proposed projects that directly impact the County Budget also require Form 2B – Budget Impact Analysis. No projects meet the criteria for potential funding in FY 2011. Note that the County Commission project –Judicial Center and Court House Restoration – will eventually impact the General Fund budget, although even if construction were to commence on 1 July 2010 it would be at minimum an additional year before budgetary requirements involving the General Fund would begin.

With the exception of the Jefferson County Board of Education, each entity's submission is entered into the Capital Improvement Plan *on line* database, which permits comments from the Impact Fee Coordinator to be included with Form 1. In the case of the Board of Education, CIP Form 2 documents are not required. Thus, the BOE forms are presented in their original format without discussion from the Impact Fee Coordinator. The original submissions from the remaining entities are on file within the Department of Capital Planning and Management.

One role of the Impact Fee Coordinator in preparing the Capital Improvement Plan is to indicate which projects, within each category for which impact fees are collected, are eligible for funding by impact fees. There are two important decision points made when considering each project:

- 1. Does the project represent expansion of an acknowledged capital category?
- a. If the answer is *no* (in other words the project may represent maintenance or replacement, or an effort to increase the *standard of service*), then the project is ineligible for funding using impact fees. It is important to note that such projects *are not* generally ineligible for funding by other revenue sources.
- b.If the answer is *yes*, then the second decision point applies:
- 2. Is the requested project necessary only because of new growth?
- a. If the answer is *yes*, then the project is potentially fully fundable using impact fees.b. If the answer is *no* (generally because there is a repair, replacement, or increase in the standard of service component), then the project is usually only partially fundable by impact fees.

In cases where a project may be funded using impact fees, the Impact Fee Coordinator examines the current cash flow analysis to determine how much in collected funds is attributed to the relevant capital category. The cash flow analysis also tracks fee disbursement over time, so it is a useful tool for providing guidance on overall spending trends. The cash flow analyses for each of the fee categories are presented on the following pages.

# **Cash Flow Analyses**

The following 4 tables constitute the official cash flow analyses for each of the 4 impact fee categories. The financial data are cumulative through 1 January 2010 (early third quarter FY 2010). The projected balance runs through the end of FY 2010. For the purposes of projecting the cash flow analysis to the beginning of FY 2011 it was assumed that 60 new permits for residential construction (single family homes) would be processed between 1 January and 30 June of 2010. Higher or lower growth rates will affect the projected data accordingly.

	Balance as of	1 January 2010		
Capital Category	Allocation	Total Collected	Total Expended	Available
Buildings - Elementary School	30%	\$4,205,321	\$3,256,810	\$948,511
Buildings - High/Middle School	63%	\$8,831,174	\$7,900,000	\$931,174
Admin/Support	7%	\$981,242		\$981,242
Total for Schools	100%	\$14,017,737	\$11,156,810	\$2,860,927

# Jefferson County Government ANNUAL and FIVE YEAR PROJECT REQUEST

and JUSTIFICATION

Agency/Department: Sheriff of Jefferson County

Project Title: Route 230 Uvilla Sub-station

Project Type: Land Acquisition

Date this form prepared: 11/30/2009

Project Location: Jefferson County Sheriffs Office

Project Rank: Optional/Deferrable

Project Need: Project benefits BOTH new and existing growth

Budget Impact: Yes

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

In an effort to improve upon our responses for the publics calls for service and provide the Harpers Ferry Shepherdstown communities with the level of police services that they deserve a police facility (sub-station)should be placed in close proximity to these communities. In positioning such a facility along the Route 230 and Bakerton corridor would allow on duty deputies who are assigned to this area the ability to greatly reduceresponse time to calls for service and allow for directed patrol activities whenever time allows. Having deputies assigned to this facility will allow for familiarity of the environment and its citizens thereby creating anatmosphere of partnership and ownership between the community and the sheriffs office. Additionally this facility would provide both an immediate safe haven for those persons in immediate critical need of assistance and alocation by which citizens and victims alike may meet with law enforcement to address issues concerns and to work on investigative matters and to file police reports.

Project Title: Land Acquisition for Parks

Project Type: Land Acquisition

Date this form prepared: 12/16/2009

Project Location: <u>TBD</u> Project Rank: Urgent/Mandatory

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

According to the 2004 Comprehensive Plan adopted by the Jefferson County Commission Jefferson County is currently in a deficit of 210 acres of parkland. National standards recommend that to serve local needs the ratio of park and recreation space should be approximately ten to twenty acres of land for each 1000 residents. Jefferson County has only 240 acres of park land to serve the estimated 44000 residents. According to the comprehensive plan if this issue is not addressed by 2020 the county will be in a deficit of over 400 acres of park land. Land will never be any less expensive than it is now and the amount of undeveloped land in the County is decreasing quickly. The county currently owns 8 parks throughout the county: Bolivar Nature Park in Bolivar Leetown Park in Leetown Mt. Mission Park in Shannondale Moulton Park near Charles Town Sam Michaels Park on Job Corps Road Mission Ridge near Shannondale Harvest Hills in Shenandoah Junction and South Jefferson Park in Summit Point. Since the county does not own any park land in the Shepherdstown area (although it does have a 10-year lease with the Shepherdstown Mens Club to manage Morgans Grove Park) the first area of the county that parkland should be acquired is the Shepherdstown area. Additional parkland throughout the county will also be identified.

#### Project Title: Moulton Park Improvements

Date this form prepared: 12/16/2009

Project Location: Parks throughout Jefferson County

Project Rank: Necessary/Needed

Project Type: Renovation

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

Moulton Park is unique in the Jefferson County Park System in that it offers access to the beautiful Shenandoah River. The mile of river frontage is used by both individuals and groups as an ideal location for a picnic lunch fishing bird-watching and camping. Over the past year the JCPRC has developed a concept plan for Moulton Park that includes the following improvements:Moulton Park Erect Road Barriers: Moulton Park directly fronts Bloomery Road and currently there is no barrier between the road and the park property. This is a liability for both the park property as well as the safety of the community. RoadParking Barriers would prevent cars from driving into the non-parking areas and creating damage as well as prevent children from entering the road from camping sites. Moulton Park Install Campsites and Parking: No designated campsites currently exist at Moulton Park and parking is extremely limited. The installation of specific campsite areas will formalize camping and will contain areas utilized for open fires.

#### Project Title: Park Improvements

Date this form prepared: 12/16/2009

Project Location: Parks throughout Jefferson County

Project Rank: Necessary/Needed

Project Type: Renovation

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

As Jefferson Countys existing parks age renovations upgrades and improvements are often necessary in order to maintain safe facilities. Many of the structures and facilities at the county parks are more than 30 years old and are in need of major improvements. In addition a certified playground safety inspector conducted a thorough audit and determined that three of the playgrounds needed improvements in this area. Leetown Park Install Safety Netting on the Slow Pitch Field (Facing Leetown Pike): The lack of adequate safety netting on the slow pitch field at Leetown Park currently represents a liability for property damage and personal injury with the potential of balls leaving the field and hitting cars on Leetown Pike. Installation of adequate safety netting would reduce the risk of property damage and personal injury. Sam Michaels Playground 1 Install handicapped parking access ramp to play area and at least one piece of ADA compliant play equipment. South Jefferson Playground Install handicapped parking access ramp to play area and at least one piece of ADA compliant play equipment. Mt. Mission Playground Install handicapped parking access ramp to play area and at least one piece of ADA compliant play equipment.

### and JUSTIFICATION

Agency/Department: Jefferson County Emergency Services Agency Project Title: Zoll Autopulses Acquisition of Major Date this form prepared: 12/7/2009 Project Type: Equipment Project Location: JCESA Project Rank: Urgent/Mandatory Project Need: Project benefits BOTH new and existing growth Budget Impact: No DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed). Purchase Zoll Autopulses. This is an extremely successful medical unit that provides masterful CPR to patients that are in cardiac arrest. Currently the JCESA has 3 of these units in use in Jefferson County and have had several life saving incidents thanks in part to these Autopulses. We want to purchase 3 more over a 3 year period to provide to remote EMS stations in Jefferson County. Justification: Lives. With a continuing increase in the number of cardiac incidents and time proven success we strongly urge this purchase. Estimated Total Cost of Project (\$): \$49,000.00 Prior Allocation (\$): \$0.00 (2011) Current Funding Request Breakdown by Year (\$): \$16,000.00 Request (2012) Out Year 1 \$16,000.00 \$17,000.00 (2013) Out Year 2 \$0.00 (2014) Out Year 3

### ANNUAL and FIVE YEAR PROJECT REQUEST and JUSTIFICATION

Agency/Department: Jefferson County Fire & Rescue Association Project Title: Training Grounds Site WorkBuilding Project Date this form prepared: 12/11/2009 Project Type: Services Project Location: Fire & Rescue Association Training Grounds Project Rank: Urgent/Mandatory Project Need: Project benefits BOTH new and existing growth Budget Impact: No DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed). Due to the growth in the County is has become more important for the fire and rescue community to become self sufficient in our training. The growth has dictated the county through the Emergency Service Agency that carrier firefighters by employed to assist the volunteers with the emergency needs. The State of West Virginia has recently changed the requirements needed for fire training which includes increasing the training hours for certification and also requiring that live burns be performed. With the mandates of the state as well as our own needs it has become necessary for the Association to establish a training facility on the training grounds in Jefferson County. Currently there are not any facilities that the emergency personnel in Jefferson County can use for training and our present grounds do not have any structures for such training that provide training in a safe manner. The funding we are seeking is to contract with a licensed architect or planner to provide us with an adequate site plan to include structures. Estimated Total Cost of Project (\$): \$35,000.00 \$0.00 Prior Allocation (\$): \_\_\_\_\_ (2011) Current Funding Request Breakdown by Year (\$): \$35,000.00 Request \$0.00 (2012) Out Year 1 \$0.00 (2013) Out Year 2 (2014) Out Year 3 \$0.00 \$0.00 (2015) Out Year 4 \$0.00 (2016) Out Year 5

DESCRIBE METHOD OF CALCULATING ESTIMATED COST OF PROJECT: (See Instructions)

The project is based on like services used this calendar year for architectural work performed with Independent Fire Company.

### ANNUAL and FIVE YEAR PROJECT REQUEST and JUSTIFICATION

Agency/Department: Bakerton Fire Company

Project Title: New Building - Fire Station Construction

Project Type: Construction

Date this form prepared: 1/4/2010

**Jefferson County Government** 

Project Location: Bakerton Fire Department

Project Rank: Urgent/Mandatory

Project Need: Project benefits BOTH new and existing growth Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

The Bakerton Fire Department was established in April 2006. The grounds for the station were acquired in 2007 and the station was constructed during 2008. A loan was acquired to cover the total construction cost. This included the building parking lot septic system and storm water management. The creation of the BFD was needed due to the impact of growth in the Bakerton and surrounding areas. Prior to the creation of the Bakerton Fire Department Shepherdstown and Friendship (HF) Fire Departments were the only providers to this area. This service was inadequate due to the distance to the calls and the increased amount of calls to this and other areas. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus andor supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. This in addition to current expenses will put BFD in an extreme financial hardship.

Agency/Department: Bakerton Fire Company

Project Title: Purchase Radios Compatible with the new JCEOC System

Acquisition of Major Project Type: Equipment Date this form prepared: 1/4/2010

**Jefferson County Government** 

Project Location: Bakerton Fire Department

Project Rank: Urgent/Mandatory

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

Recently the Jefferson County Emergency Operations Center implemented a new radio system. When the system was being developed the BFD did have as many vehicles as it has now. Therefore the BFD did not received enough of the county supplied mobile and portable radios chargers or accessories. In order to follow the standard being set by the JCEOC the BFD will need to purchase 5 mobile 14 portables 3 bank chargers and associated accessories. I would like to emphasize that these are not extra radios but those needed in order to operate during emergencies. These will be needed in order to ensure proper communications and ensure firefighter and public safety. Some departments received grants for the purpose of purchasing additional radio equipment but BFD did not. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. This in addition to current expenses will put BFD in an extreme financial hardship.

### Jefferson County Government ANNUAL and FIVE YEAR PROJECT REQUEST

and JUSTIFICATION

Agency/Department:	Bakerton	Fire	Company	

Project Title: Purchase new Ambulance - New Service

Acquisition of Major Project Type: Equipment Date this form prepared: 1/4/2010

Project Location: Bakerton Fire Department

Project Rank: Urgent/Mandatory

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

The BFD currently does not provide ambulance service to its run area. Shepherdstown and Friendship (HF) Fire Departments are the providers in this area. This service is inadequate due to the distance to the calls and the increased amount of calls to this and other areas. In order to ensure the residents of our area are getting adequate treatment the BFD would like to start providing ambulance service. The department currently has a 1992 2wd Ford F-350 type I unit that was donated by Gainsville VA. The BFD has plans on trying to begin its service with this unit but will need a new unit to ensure the safety and continuity of service to our residents. Every department has a primary and backup unit to be used if there is more than 1 call at a time or if one unit is out of service. Due to its age and general condition the BFD would like to use the 1992 Ford as a 2nd due and or backup unit. As with all departments the EMS service is increasing as a faster rate than fire service. This service is badly needed due to impact of growth in our area. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. This in addition to current expenses will put BFD in an extreme financial hardship. The department will not be able to purchase a fire engine and an ambulance at the same time and can not be forced to make a choice as to which is more important than the other.

Agency/Department: Bakerton Fire Company

Replacement of all SCBA's (self contained breathing

Project Title: apparatus) Acquisition of Major

Project Type: Equipment

Major

Date this form prepared: 1/4/2010

Project Location: Bakerton Fire Department

Project Rank: Urgent/Mandatory

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

Purchase 26 NxG75 Scott 4.5 scba's with 45 minute lightweight bottles. The BFD is the only department in Jefferson Co. that does not have 4.5 (4500 psi) high pressure air packs. Our scba's are 2.2 (2200 psi) low pressure systems. BFD scba's are not compatible with the rest of the county. Also they do not meet current standards for buddy-breathing or integrated pass devices. This means the PASS (person alert safety system) is not part of the actual system. New systems have them integrated so that they are automatically turned on when the user turns on the scba. The PASS device is used when a firefighter is trapped or unable to move and sounds an alert tone so rescuers can find them. The buddy-breathing is the capability if on firefighter to hook his mask to the system of another firefighter. This is critical when one person runs out of air when in a hazardous environment. It is critical that BFD replace this system as soon as financially and physically possible. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. This in addition to current expenses will put BFD in an extreme financial hardship.

Project Location:	Bakerton Fire Department		
Project Rank:	Urgent/Mandatory		
Project Need:	Project benefits BOTH new and	existing growth	
Budget Impact:	No		

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

Purchase 20 sets of PPE (personal protective equipment) to include full turn-out gear (interior firefighting gear) extrication jumpsuit helmets boots and misc. equipment. Members currently use a mix of old and fairly new PPE. Some does not meet current NFPA standards and does not meet Jefferson Co. Fire & Rescue Assoc. standard for gear identification. Purchase a uniform gear storage system. Currently members hang their gear on a wooden rack. This system is efficient at air drying the gear as well as not easily identifiable or organized. Current system is not impermeable to cross contamination. Purchase a certified PPE washing and drying system. NFPA recommends that fire gear be cleaned by specialized cleaning equipment or be professionally cleaned by an outside contractor. This is due to the hazardous contaminates that soak into the fear during fire and rescue operations. Over time these contaminates begin to breakdown the material and the gear becomes less protective. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. and existing growth

Purchase hazardous detection equipment. Purchase 2 thermal imagers. These devices are used for fire heat detection during the investigation and or clean up stages of a fire. The imagers are a standard tool used by all fire departments. They have been critical in finding smoldering fires so as not to have a rekindle. The imagers can also be used for search and rescue. The heat detection will show body heat of individuals who may be lost. Purchase 2 gas analyzers. These devises are used for the detection of hazardous gases and levels of oxygen in hazardous environments. Most often used for carbon monoxide alarms. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. <b>Project Title:</b>	Purchase Mult-Purpose Fire Truck		
Project Type:	Acquisition of Major Equipment	Date this form prepared: 1/4/2010	
Project Location:	Bakerton Fire Department		
Project Rank:	Urgent/Mandatory		
Project Need:	Project benefits BOTH new a	and existing growth	
Budget Impact:	No		
ESCRIPTION AND JUSTIFIC	ATION (See Instructions for Form 2 - attach add	litional pages as needed).	

Purchase a new multi-purpose multi-function fire truck. The BFD'S current engine is an 86 Ford with a 5 man open cab. This means that the crew area of the cab is open to the outside in the back. It provides limited shelter from the ran snow etc. The crew members are also exposed to heat and cold. this engine also can only function as a fire engine. The proposed replacement unit would be a combined Engine Rescue Quint (ladder). The BDF current does not have a rescue truck with jaws of life extrication equipment nor does it have a ladder truck. By replacing the current engine with the multi-function unit you get all the benefits of 3 trucks with the cost of one truck. This would be a great benefit to the citizens in our response area. The current engine also does not meet current NFPA or DOT guidelines for crew safety or emergency lighting or striping. The BFD has limited sources of income. Limited parking due to storm water management and distance setbacks prohibits the BFD from holding fundraisers in our station. Additionally there are no commercial businesses in our area in which to solicit from. It is critical the BFD receive additional funding to put towards our building loan. The BFD was fortunate to have many departments donate older apparatus and or supplies. The BFD has normal operation expenses as well as repairs to these apparatus. In the near future we will need to consider the purchase of newer apparatus that meets current safety and operation standards. This in addition to current expenses will put BFD in an extreme financial hardship.

### Jefferson County Government ANNUAL and FIVE YEAR PROJECT REQUEST and JUSTIFICATION

Agency/Department: Citizens Fire Company

Project Title: Rescue Engine

Acquisition of Major

Project Type: Equipment

Date this form prepared: 12/10/2009

Project Location: Citizens Fire Company Project Rank: Necessary/Needed

Project Need: Project benefits BOTH new and existing growth

Budget Impact: No

DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed).

Our department currently operates a 1989 Rescue and a 1997 Pierce Engine. The Rescue is out dated for the needs of todays community and the Engine is our most frequently utilized piece of apparatus. By replacing these two units with one new Rescue Engine we will be more prepared to meet and serve the current needs of our community as well as prepare for its ever expanding future needs. One of the most prevalent needs for this unit is to respond to motor vehicle accidents that may or may not involve entrapment and the need for extrication equipment to remove occupants from the vehicle. This single unit would enable Citizens Fire Company to perform two separate functions with one unit and much less manpower. Traffic is an ever increasing reality for Jefferson County and will continue to multiply on a daily basis. The approval of table games alone will have a dramatic impact on our traffic patterns and will undoubtedly bring more vehicles into the county which unfortunately will ultimately increase the number of motor vehicle accidents where our tools equipment and expertise will be needed. We are the primary response company for a large section of US Rt. 340 Rt. 9 and will also be the primary responders to the new section of roadway currently under construction from RT 9 to Loudoun County VA all of which have high volume vehicle and commercial traffic. This new unit would greatly affect our level of response and assistance being provided to those in our community in their time of need. In addition to its usefulness on motor vehicle accidents a Rescue Engine is also utilized on fire scenes and can be used to fight fire or for equipment to rescue our citizens and cane also perform all other fire ground related tasks. The usefulness of this apparatus can not be overstated as it will be a tremendous asset to the citizens of Charles Town as well as the residents of Jefferson County.

Agency/Department: Independent Fire Company Project Title: Station Generator System Date this form Project Type: Construction prepared: 12/11/2009 Project Location: Independent Station Project Rank: Necessary/Needed Project Need: Project benefits BOTH new and existing growth Budget Impact: No DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed). With the increased growth in Jefferson County space needed for housingshelter during a local state or national emergency has become a premium. Independent's social hall has the ability to be used for temporary shelter of emergency workers or the general public. Currently Independent does not have any emergency generator system to allow us continued operation should there be an extended power outage. An emergency power system would allow us to provide shelter supplying creature comfort and the operation of a full service kitchen in order to sustain emergency workers or the public during such an emergency. Estimated Total Cost of Project (\$): \$65,000.00 Prior Allocation (\$): \$0.00 (2011) Current Funding Request Breakdown by Year (\$): \$65,000.00 Request \$0.00 (2012) Out Year 1 \$0.00 (2013) Out Year 2 \$0.00 (2014) Out Year 3 \$0.00 (2015) Out Year 4 \$0.00 (2016) Out Year 5 DESCRIBE METHOD OF CALCULATING ESTIMATED COST OF PROJECT: (See Instructions) Gathered about station systems and installation.

### Jefferson County Government ANNUAL and FIVE YEAR PROJECT REQUEST

### and JUSTIFICATION

Agency/Department: Shepherdstown Fire Company Project Title: Public Fire Education Acquisition of Major Date this form prepared: 12/3/2009 Project Type: Equipment Project Location: Shepherdstown Fire Department Project Rank: Necessary/Needed Project Need: Project benefits BOTH new and existing growth Budget Impact: No DESCRIPTION AND JUSTIFICATION (See Instructions for Form 2 - attach additional pages as needed). The Shepherdstown Fire Department recognizes that the best way to save lives is to prevent placing them in harms way. The introduction of public life safety education programs throughout the United States has resulted in significant decreases in the number of emergency incidents per capita as well as the severity of these incidents. The Shepherdstown Fire Department is requesting funding for life safety education materials which can be used for public life safety education for the citizens. The International CityCounty Managers Association has reported that an increase of 10% in life safety education is directly linked to a 10% reduction in fire loss injury and death. The department is seeking funding to purchase the following materials: Combination sprinklerfire safety house - \$50670 Fire sprinkler System - \$ 1365 Weather smart package \$ 5300 Honda Generator \$ 4750 Ramp for handicap accessibility - \$ 975 Burning trashcan - \$ 445 Communications center - \$ 575 Lighting package - \$ 1850 Prop group - \$ 695

This vehicle is used to support during fires and othe continues to expand the need te faster than population gro l response capability within seeking funding to fill this tial response unit. This unit water rescue trench emergence is kind is up to 25 minutes a sapparatus is needed to response are directly tied to the ind mber of properties and constr This request will allow the l life threatening incidents liminish the chances for long	iring heavy vehicle he trench rescue and two is filling. The need for direct proportion to the provide specialized rescue vehicle crashes as well as er major events. As the for such capabilities is owth. At the present time the Shepherdstown area and ever widening gap with the will be capable of providing ies structural collapse gencies. Currently the away from the Shepherdstown pond to an increasing number crease in population and ruction type within the e department to rapidly and improve the potential

Estimated Total Cost of Project (\$): _	\$450,000.00	
Prior Allocation (\$):	\$0.00	
	\$90,000.00	(2011) Current Request
Funding Request Dieakdown by Teal (\$).	\$90,000.00	(2012) Out Year 1
-	\$90,000.00	(2012) Out Year 2
-	\$90,000.00	(2014) Out Year 3
-	\$90,000.00	(2015) Out Year 4
	\$0.00	(2016) Out Year 5

### DESCRIBE METHOD OF CALCULATING ESTIMATED COST OF PROJECT: (See Instructions)

The department conducted a survey of three fire apparatus manufacturers and applied the average cost of a fire engine capable of meeting the needs of community growth.
