

Acquiring and Processing UAV Data

SYTIL MURPHY AND STEVE SHAFFER

SHEPHERD UNIVERSITY

SEPTEMBER 13, 2018

Pros and Cons of UAV Data

PROS

Cutting edge

Students gain experience with data acquisition and processing

Resolution of < 10 cm is easily possible

CONS

Coverage area is small

File sizes and quantity

Processing time

Data Acquisition

Shepherd's Drones

DJI Phantom 3 Advanced

Upgraded to include a Sentra NDVI Sensor

Capable of taking:

- RGB images
- NIR images

With Sentra's software, it is capable of performing NDVI's

Shepherd's Drones

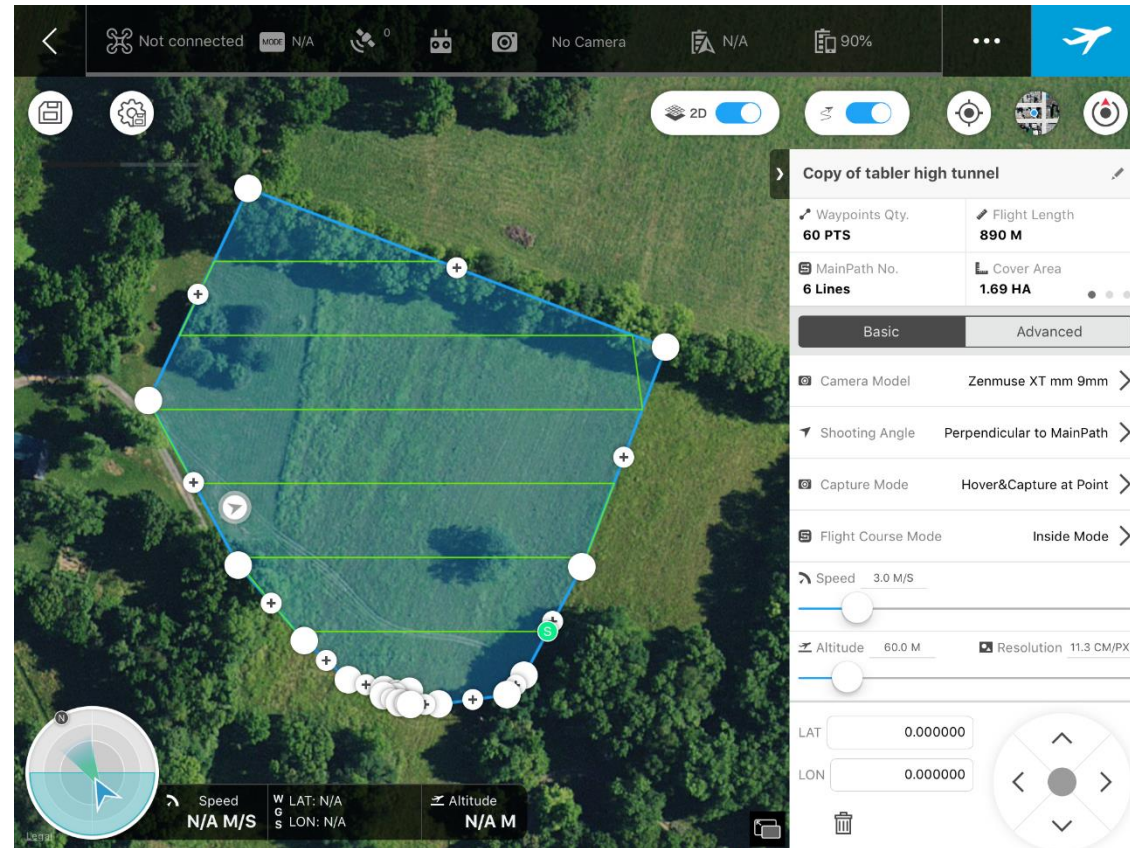

DJI Matrice 100

Capable of taking:

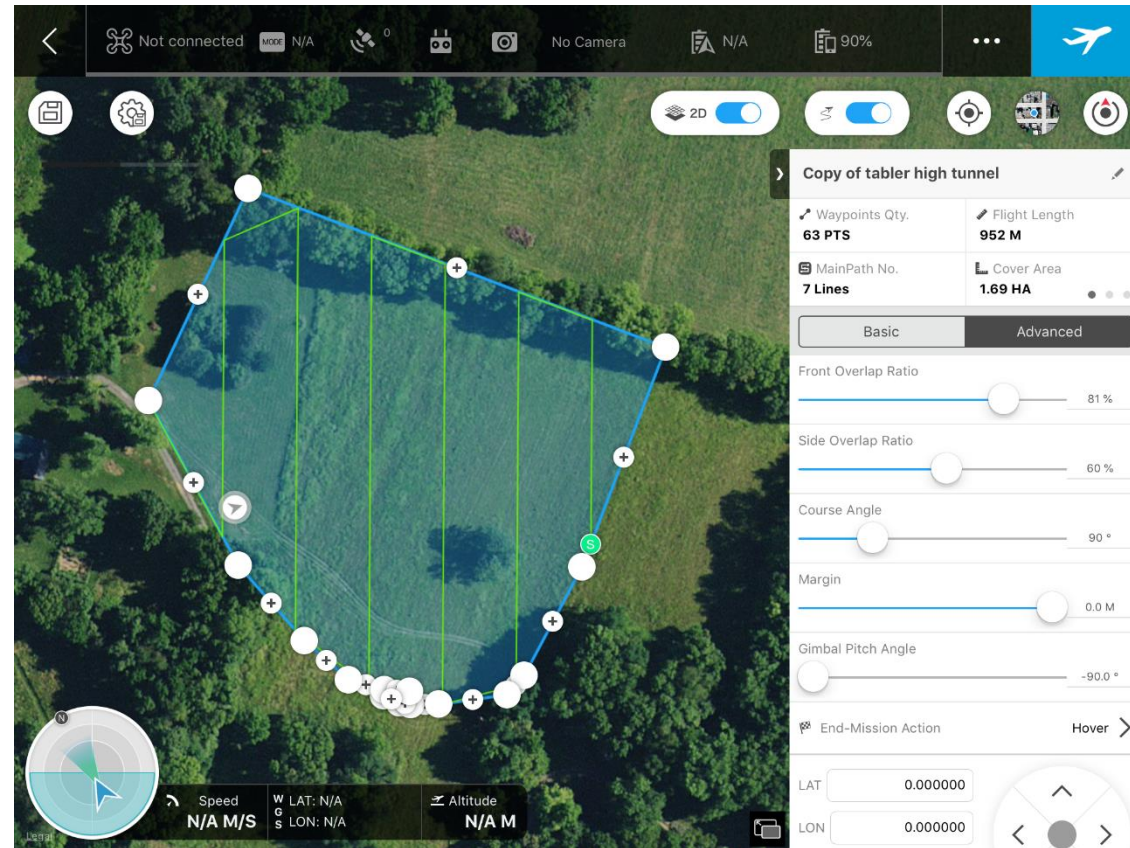

- RGB images
- Multispectral images (R, G, B, NIR, Red Edge)
- Thermal infrared images

Purchased with a WV Science and Research Instrumentation Grant

Data Acquisition – DJI GSP

Data Acquisition – DJI GSP

Data Acquisition – MicaSense RedEdge

Storage 29.0 of 29.7 GB Free

Sats 4 Used / 16 Visible

Time 2015-10-05 11:20:52 UTC

Location 47.65291, -122.34428

Altitude 32.9m MSL / 6.3m AGL

Speed 0.07m/s

Course 179.5° (True)

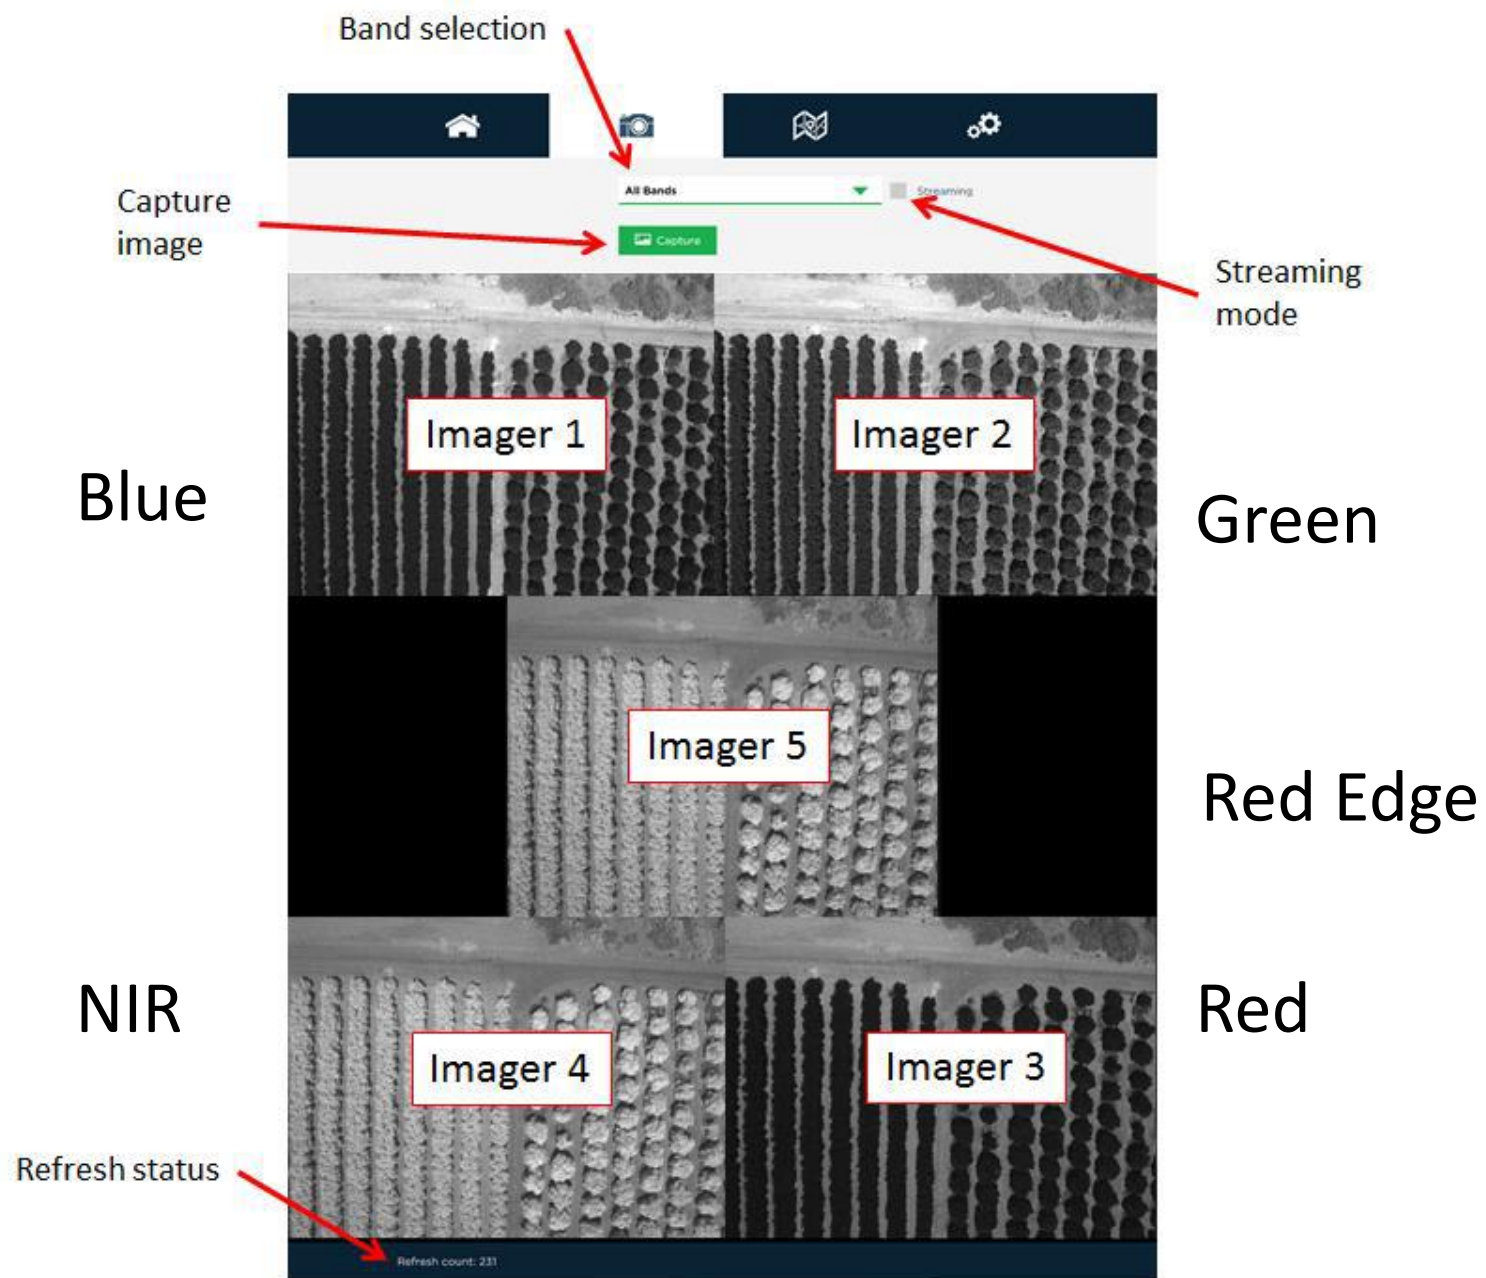

Capture Config
Target Alt: 100m AGL
Along-Track: 80%
Cross-Track: 80%

Number of satellites used
for GPS solution (>0 = FIX
VALID)

Resets to 0 m AGL five
seconds after GPS fix

Satellite signal strengths

Red Edge Reflectance Calibration

Data

For RGB and Thermal IR cameras: <99 images/flight

For MicaSense camera: thousands of images/flight

For a flight:

- Thermal – 63 images
- RedEdge – 1935 images
 - 1830 images at height
 - 25 calibration images
 - 80 discard images

Data Processing

Sort the Data

Calibration targets are easy

Low images are grouped at beginning and end of data sets

Coarsely sort data by looking at it

Import sorted data into Agisoft PhotoScan to improve sort

20 minutes to sort ~4000 images

Agisoft PhotoScan – Import Photos

NDVI

Where to From Here

Working on linking lab computers together in order to reduce processing time

- Allow us to increase reconstruction quality

Need to verify the results of the NDVI

- Compare to LandSat?

Begin looking at other analyses that can be performed
