PHASE I ENVIRONMENTAL SITE ASSESSMENT

Prepared For

**AMERICAN PUBLIC UNIVERSITY SYSTEM, AND AFFILIATES
111 W. CONGRESS STREET
CHARLES TOWN, WV 25414**

Subject Property

**2 EXECUTIVE WAY
RANSON, WV 25438**

Prepared by: 
Arthur A. Shellhouse, CPEA
Environmental Auditor

Date: July 6, 2010

This report is solely for the use of American Public University System, and Affiliates, and reflects only the investigations conducted herein. Determination as to the presence of environmental contamination that would require analytical testing of water, air, soils, or building materials is beyond the scope of this study. The report was prepared in accordance with ASTM format (Standard E-1527-05) for Phase I environmental assessment reports. The client proceeds at its own risk in relying on the use of Government data in whole or part for any transaction.

**PHASE I ENVIRONMENTAL SITE ASSESSMENT
2 EXECUTIVE WAY
RANSON, WV**

EXECUTIVE SUMMARY

Nutshell Enterprises, LTD. has been retained to perform a Phase I Environmental Site Assessment (ESA) in general accordance with the scope of work and limitations set forth in ASTM Standard E-1527-05, and EPA-AAI standards.

The ESA is designed to provide the User with an assessment concerning environmental conditions (limited to those issues identified in the report) as they exist at the property.

The subject property is a former industrial warehouse building that was last occupied by Kidde Fire Fighting. The warehouse has offices and an attached building that is identified as 351 W. 2nd. Avenue. The buildings are vacant at present.

The subject is in an area known as the Commerce Corridor, with fifteen significant Brownfield's properties within a 1.5 mile corridor. The subject property is not listed as a Brownfield's site, but two adjoining properties are listed.

The adjoining Veiner property has prior "recognized environmental conditions" (REC's), as defined in ASTM Standard E 1527-05 for Phase I reporting. The historic use of the property has been reported to have included a former electric plant with dynamos and transformers on Parcel 12, a former junk shop with aboveground petroleum tanks on Parcel 6, and machinery storage on Parcels 5, 6, and 7. Parcel 7 has also been identified as a former gasoline service station location.

The prior use of the property has been proven to have contaminated the site's shallow soils with chromium, thallium and lead, PCB's, petroleum and semi-volatile organic compounds. The property has been enrolled in the U. S. Brownfields program and has had a prior Phase I and Phase II prepared under a grant from the Federal government to the cities of Charles Town and Ranson. Due to the historic use of the property and the confirmed contamination of surface soils, the subject parcel at 310 N. George Street is considered to have Historical REC's.

The adjoining property to the north of 332 N. George Street is a former Union 76 gasoline service station that has had several tanks taken out of service. There is no report of a petroleum release at the site, however continued use of the site as an automotive repair facility constitutes an adjoining property REC.

The adjoining property located to the west is the former Maytag powder spray painting facility, which is also enrolled as a Brownfield's site.

Current use of the subject property does not impose any future or potential REC's, however the history of the site suggests that there may have been historic releases of heavy metals, and volatile organic compounds that were used and stored within the on-site buildings.

The property has not been identified as requiring corrective action by EPA, however there were civil penalties imposed on Kidde Fire Fighting in 2006 for failing to file annual hazardous waste reports. There is no documented report of any release of heavy metals or VOC's, but EPA reports that the site has unknown environmental concerns:

1. unknown human exposure to contamination
2. migration of contaminated groundwater at site under control

It is noted that the property is not within a FEMA 100 year floodplain. We found no evidence of wetlands, stained soils or pavement, distressed vegetation, or areas of mining.

Non-ASTM scope issues include business risk environmental issues that are not classified as a release of hazardous materials, petroleum products or controlled substances. We found no evidence of asbestos insulation or building materials, and do not suspect the facility to have lead based paint. The building has many fluorescent light fixtures, which could have ballasts containing PCB's, however testing of ballasts is not within the scope of a Phase I investigation.

Nearby properties include former gasoline stations, the B&O Railroad tracks and former CSX Transportation facility, industries that have histories of generating hazardous wastes. Residences and businesses are also present along N. George Street and the immediate cross streets.

It appears that the local area and the subject property have been served with public water and sanitary sewer service, as far back as 1930. There is no current or future use of groundwater in the area.

I. INTRODUCTION

The stated purpose of this environmental site assessment is to ascertain potential environmental liability defined as "recognized environmental conditions (REC's) as defined in ASTM Standard E 1527-05 at this location. Specifically, the standard describes REC's as the present or potential release of hazardous materials, petroleum products and controlled substances, and the historic potential for releases, and the potential for impact from releases on adjoining properties. There are no special terms or conditions that we are aware of concerning the financing of the subject, however limiting conditions include the reliability of the regulatory lists reviewed and conditions which were not readily visible to the environmental auditor.

II. PROPERTY DESCRIPTION

A. Property location and legal description

The subject property is listed in the Jefferson County Sheriff's Tax Office records in several Real Property accounts as follow being located at 2 Executive Way, Ranson, WV, 25438. A second address for the property appears to be 351 W. 2nd. Avneue. The property was known as the Kidde Fire Fighting. An enclosed EPA Facility Detail Report lists the property owners as either Williams Holdings LLC, or Pentagon Hse-Sir, F. Whittle Road, Darby, England.

The property is shown in an attached Dewberry & Davis, LLC print dated October 12, 2005 as being the Maytag Corporation Property, consisting of 10.481 acres of land, part of which is the subject property. The plan indicates the parcel to be #74, with two lots covering the site. One lot is located to the north and east side of the site and is listed at CTC M2P1, Maytag Corp. D.B. 713 P. 215. The second lot is located on the south and west sides of the site and is listed as RC MG P129, Maytag Corp. D.B. 713 P. 215.

The map scale is 1" = 60', however it appears that the print has been reduced in size, making it difficult to determine the exact acreage of the parcel, however it appears to be approximately 2 acres in size.

The property is an irregular shaped lot that contains an industrial warehouse building of 82,000 SF, 24,000 SF of which has been used as office space. The property is situated on the east side of Executive Way, adjoining the B&O Railroad tracks to the south, and W. 2nd. Avenue to the north.

The site coordinates are: Latitude/Longitude: 39-17.477N/77-51.773.

B. Property and vicinity characteristics

The southern end of the property has a paved parking lot that borders the B&O Railroad tracks. The parking lot access is from Executive Way, which is an extension to Lawrence Street. The property contains a steel and concrete block warehouse building and has a small concrete block building on the northeast corner of the lot. The smaller building is connected to the larger warehouse by a metal runway and canopy.

There are loading docks on the north end of the building, and access to the docks is from W. 2nd. Avenue. Water service comes into the property from the north. HVAC equipment is located on the east side of the warehouse, and there are three 10,000 gallon propane tanks located in an enclosed area on the east side of the building.

There are industrial properties located to the north of the subject. The former Maytag property is currently used as the Town of Ranson civic center, and another industrial building to the southwest of the subject is currently the Boys and Girls Club of Jefferson County. The new American Public University library building adjoins the site to the east,

and an electrical substation abuts the site to the northeast. There is a large paved parking lot located on the west side of Executive Way.

C. Property hydrology

There are no storm water retention or treatment systems on the industrial property. The parking lot on the south side has two storm water catch basins, and runoff of rain water from the building runs across the parking lot to the storm drains.

It appears that runoff flows south to a ditch bordering the railroad tracks. Public water enters the site on the south side of the building, from Executive Way.

There are no bodies of water on the site, and the site is not listed as having Federal wetlands. The site is not within a 100 year floodplain.

D. Property hydrogeology

There are no domestic wells in the area. Groundwater directional flow has not been reported, but is expected to mirror surface topography and flow to the south southwest to Evitts Run.

There is one nearby Federal water supply well located between 1/8-1/4 mile SSE. It is registered as Well ID WV99190. There are no State water wells listed in the area within 1/4 mile of the subject, and there are no active domestic wells nearby. The listed domestic well is listed as groundwater under the influence of surface water, and was located at 116 E. Washington Street. The well served a population of 25 people, was hypo chlorinated, and had a history of nitrate contamination. The well appears to have been abandoned.

There are two USGS wells located within 1/8 mile of the subject. The depth to groundwater is not listed, however we have evidence from site borings that groundwater is at a depth of over 20' bgs at this site.

The enclosed GeoCheck section of the EDR Field Check Report indicates all local wells, and any available groundwater directional flow calculations. The site elevation is approximately 519' AMSL. The report also lists information concerning site topography, geologic information of the area, dominant soil composition in the general area, and local soil types.

The soils on site are classified as Hagerstown Component consisting of silt loam to a depth of 8", followed by clay to a depth of 72" below grade. The soils have infiltration rates from 0.60-6.00 in/hr.

The Rock Stratigraphic Unit for the subject area is listed as within the Paleozoic Era, Cambrian System, Cambrian Series, Stratified Sequence Category.

A USGS topographic map of the local area is enclosed with this report.

III. STANDARD ENVIRONMENTAL RECORDS REVIEW

The enclosed EDR Field Check report lists all current Federal and State environmental records that meet the search requirements of ASTM Standard E 1527-05 for Phase I reporting. The subject is listed. Significant listings nearby include (1) LUST site under 1/8 mile distant, (6) UST sites within 1/8 mile, (7) U. S. Brownfields sites within 1/8 mile, including the subject property, and the former Charles Town Coal Tar Site, which is a CERCLIS site located ¼-1/2 mile SSW on W. Congress Street.

The subject property is listed as follows:

- Kidde Fire Fighting Machinery – West 2nd. Avenue – listed as a Federal FINDS registry site
- Kidde Fire Fighting – 2 Executive Way and 351 W. 2nd. Avenue also listed as a FINDS site; registry numbers ID-1100200588 and ID-110038016250
- Kidde Fire Fighting – listed as a RCRA Non-Generator, at W. 2nd. Avenue; EPA generator number – WV0000026153; listed as being a large quantity and a small quantity generator under the name of Kidde and Badger Fire Protection; listed as having compliance issues with EPA from 2002 until 2005; mainly record keeping infractions; compliance inspections performed in 2006 and 2007
- Kidde Fire Fighting Co. – West 2nd. Avenue – listed as ICIS site; civil penalties imposed for record keeping for hazardous wastes

The closest properties listed are within 1/8 mile of the subject and include:

- 487'-ENE – McKinney's Auto Repair Garage (former George St. Union 76 service station); listed as a UST site, having (2) 1,000 gal. gas, (1) 2,000 gal. gas, and (2) 4,000 gal. gas tanks removed on 3/15/01; the tanks were installed between 1966 and 1977 and had been out of use for a couple of years prior to removal; no information as to whether the tanks had had a release
- 149'-NNW – Dixie-Narco Inc. (Maytag) – N. Lawrence and 2nd. Avenue; listed as a non-generator of hazardous wastes, a FINDS registry and as having a UST; 10,000 gallon waste oil tanks installed on 11/19/67 and removed on 5/1/88; generated F003 – non-halogenated solvents
- 535'- E – Veiner Site – 310 N. George St. – listed as a U.S. Brownfield's site; listed as a former warehouse with contents unknown
- 586' – SSE – Jefferson County Bd. Of Ed. Maintenance Dept – 201 W. North St.; listed as a RCRA conditionally exempt small quantity generator of hazardous chlorinated solvents; no violations of RCRA regulations cited

There are many additional listings at distances over 1/8 mile distant, and they can be reviewed in the enclosed EDR Radius Map report.

Local environmental records were requested from the Jefferson County Health Department under the Freedom of Information Act, in the enclosed letter dated May 19, 2009. As we are not a West Virginia consulting firm, they denied a response to our request.

IV. PREVIOUS PROPERTY INVESTIGATIONS

We have been given no prior environmental audits or assessments covering the subject property. We reviewed all of the prior audits covering the adjoining property at 310 N. George Street, as well as the records for the two adjoining houses located to the north of 310 N. George Street.

We have enclosed a brochure titled The Commerce Corridor, which describes the (15) significant Brownfield's properties located in the 1.5 mile corridor near the subject, with two adjoining properties listed.

We have enclosed the EPA RCRA Corrective Action Site Progress Profile on the subject, which states that the site has not been identified for corrective action, and that there is no information pertaining to the site potential for human exposure to contaminants, or if migration of contaminated groundwater at the site is under control.

The enclosed EPA Release dated 11/13/08 states that Kidde Fire Fighting Co. was fined a \$24,923 civil penalty for failing to file annual reports for lead and copper for 2006 for 215 N. Mildred Street and for 351 W. 2nd. Avenue.

V. CURRENT AND PAST USES OF THE PROPERTY

The enclosed Bing aerial photograph shows the building covering the block between the railroad tracks and W. 2nd. Avenue. There is an electric substation to the east and also a gas service station and two houses. Raw land is located to the southeast side where the new library is now under construction. Industrial buildings border the site to the north and west.

The prior industrial use of the property by Kidde Fire Fighting Company was ceased sometime around 2005. The warehouse building appears to have been used for fabrication, storage, shipping, and office space.

We have enclosed a USGS aerial photograph from 1988. It shows the site to be similar to the Bing later photo.

Sanborn Fire Insurance Map coverage is available for this area of Ranson, WV, and the available maps are enclosed, indicating the following conditions:

- 1952 – Victor Products Corp.-building abuts railroad tracks and is within Charles Town city limits; raw land to north in Ranson town limits; houses along 2nd. Ave.;

Victor plant to north side of N. Lawrence; homes to south; commercial building borders railroad lines to the southwest and southeast; houses along George St.; no electric substation on north side of 2nd Ave.; Victor Products and houses on north side of 2nd Ave.

- 1940 – site is raw land with scrap iron storage to east and storage buildings on both sides of rail tracks to west; homes to south and east; industrial plant to NE side of 2nd Ave. (R.D. Goetz); two houses adjoining site
- 1932 – similar to above
- 1922 – area less developed; appears to be mainly raw land; rail lines present
- 1915 – B&O RR present; commercial building to east along tracks; building running north to south on site near N. Charles (Lawrence St.); milling company to south of tracks; N. George St. present to east; no detail to north or west
- 1907 – small building along Charles Street abutting tracks; industrial building on George St. to east is vacant; two industrial plants to south side of tracks; north end of site not on map

VI. CURRENT AND PAST USES OF ADJOINING PROPERTIES

The property to the north of the subject is a concrete and metal industrial building that is also part of the original Maytag property. Northern Virginia Power Company has an electric substation to the north east and American Public University System has a new library building under construction to the east southeast.

Rail lines operated by CSX are located to the south of the subject. The rail line was formerly operated by The B&O Railroad and was formerly owned and operated by The Winchester and Potomac Railroad Company. The Boys and Girls Club of Jefferson County has a steel building on the southwest side of the rail line, with an open parking lot and the Ranson Community Center being located to the west of the subject.

Prior uses of the adjoining properties are covered in the historic description of the subject from Sanborn maps, topo maps and aerial photographs.

VII. PROPERTY RECONNAISSANCE

The property was inspected on June 10, 2010. We inspected the property and all adjoining properties. We also performed a windshield survey of the area. The inspection included the interior of the two buildings, and all exterior features.

VIII. INTERVIEWS

We interviewed Mr. Joseph Sladki, Senior Director, American Public University System. Subsequent telephone interviews were conducted with Ms. Dawn Seeburger, of ERC. Ms. Seeburger is a toxicologist who prepared the Phase II and follow-up opinion letter on the adjoining N. George Street property, and is part of the U.S. Brownfield's investigations in this area. Ms. Seeburger recommended that a limited Phase II investigation be performed due to adjoining property concerns. As there is a gas station

located to the northeast, and up gradient from the site, and as the station has had a confirmed release of petroleum, she recommended that soil vapor surveys or indoor air quality testing be performed within the building.

She also recommended that as the future building will meet LEEDS certifications, that subsurface soil testing should be conducted in areas where future excavations will take place.

IX. ASTM 1527-05 ADDITIONS

User Provided Information

Title information was obtained from a Real Property search of Jefferson County Records.

We are aware of no environmental liens on the property, and did not provide a lien search within the scope of our contracted services. There are no reported environmental land use restrictions in the State and Federal government environmental records that were reviewed. We have been provided with no specialized knowledge from the current or past owners.

Deviations

We are aware of no deviations to the Practice, other than owner supplied information, which is limited to a search of environmental liens, and whether there has been any valuation reduction for environmental issues.

Additional Services

Additional services other than those proposed in our initial contract have not yet been offered and accepted, with regards to environmental conditions at the subject property. Nutshell recommends herein that a limited Phase II investigation be prepared, and the scope of the investigation will be covered under separate cover.

References

All of the environmental, ownership and historic use documentation information is contained in the report as appendices. Due to their length, we have not enclosed prior Phase I or Phase II reports with this document.

Signature of Environmental Professional

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in 312.10 of CFR 312, and we have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Certified by: 
Arthur A. Shellhouse, CPEA

X. FINDINGS AND CONCLUSIONS

We found no recognized environmental concerns (REC's) on this property. There are adjacent properties that could be expected to environmentally impact the subject property. There has been a Historical REC related to the use of the adjoining property to the east for a junk shop, scrap yard, steel or iron storage, a former gas station, above ground petroleum storage tanks, and proximity to an active railroad line. Prior Phase II investigations have quantified the historic surface soil contamination at this location. Contamination of shallow surface soils included heavy metals, petroleum, PCB's, and SVOC's. Deeper contamination of petroleum hydrocarbons has also been documented.

An adjoining gasoline service station located to the northeast of the subject has also had a history of petroleum subsurface releases, and is an active automotive repair business.

We found no "business risk" environmental concerns with the property, and have recommended that fluorescent light fixture ballasts be tested for PCB's prior to removing the light fixtures.

Our recommendations for further work or study include the following:

1. Perform a current limited Phase II subsurface soil study to determine current conditions in the area of the future surfacing of the metal exterior walls of the buildings. Footers will have to be excavated to add brick or decorative concrete walls, thus dirt to a depth of at least 30" bgs should be examined for EPA regulated contaminants.
2. Perform an indoor air quality analysis by performing several shallow borings through the concrete slab of the buildings. Soil vapor would be collected with a vacuum pump and tested for regulated volatile organic compounds.

XI. CREDENTIALS

The auditor is a Certified Professional Environmental Auditor and a Certified Environmental Specialist, with both a Bachelor's and Master's degree in the environmental sciences. He has prepared over 3,500 Phase I and Phase II reports over a 35 year period with Nutshell.

The Commerce Corridor

Commerce Corridor Vision & Revitalization Plan

The Commerce Corridor (Corridor) area consists of downtown neighborhoods in both Ranson and adjacent Charles Town, arrayed along a north south road corridor in Ranson and a perpendicular east-west railroad corridor that straddles the Ranson/Charles Town border. This area revolves around Ranson's main downtown street corridor, Fairfax Boulevard, running from an abandoned chemical/fertilizer plant to the north, south through downtown residences, shopping areas and idled brownfield properties crossing over the municipal border with Charles Town. At this point, a CSX railroad line located two blocks north of Charles Town's main street (Washington Street) intersects with Fairfax Boulevard. The Corridor then extends approximately two (2) blocks east and six (6) blocks west along the railroad line through neighborhoods and brownfields in Charles Town. There are at least 15 significant brownfield properties arrayed along this 1.5 mile corridor, such as:

- Kidde Brass Foundry, a 100+ year old contaminated foundry recently acquired by Ranson for redevelopment as a mixed-use downtown center under LEED-ND standards;
- Miller Chemical/Fertilizer, a large abandoned facility in Ranson that was recently subject to West Virginia state-led cleanup and Voluntary Remediation Program (VRP) participation;
- Maytag Spray Painting facility, an idled manufacturing facility in Ranson that has been redeveloped into the Ranson Civic Center;
- Charles Town Public Works and Landfill, an operating but obsolete and contaminated public works facility located adjacent to Evitts Run Creek;
- Viener Metal Salvage Yard, a former metal salvaging site currently under redevelopment as the American Public University's Academic Center, the largest privately-financed LEED building in the state;
- Peoples Supply Granary, an idled granary and pesticide sales center located in Charles Town; and
- Supertane Coal Tar CERCLIS site, a former gas manufacturing site in Charles Town, subject to EPA emergency removal action, and undergoing further remedial investigation/action by the owner.

Commerce Corridor Vision & Revitalization Plan

EXECUTIVE SUMMARY

A search of the environmental records was conducted by Environmental Data Resources, Inc. (EDR). NUTSHELL LTD used the EDR FieldCheck System to review and/or revise the results of this search, based on independent data verification by NUTSHELL LTD. The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Federal CERCLIS list

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). CERCLIS contains sites which are either

EXECUTIVE SUMMARY

proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

An online review and analysis by NUTSHELL LTD of the CERCLIS list, as provided by EDR, and dated 01/29/2010 has revealed that there are 2 CERCLIS sites within approximately 0.5 miles of the target property.

Federal RCRA generators list

RCRA-CESQG: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

An online review and analysis by NUTSHELL LTD of the RCRA-CESQG list, as provided by EDR, and dated 02/17/2010 has revealed that there are 2 RCRA-CESQG sites within approximately 0.25 miles of the target property.

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

An online review and analysis by NUTSHELL LTD of the RCRA-NonGen list, as provided by EDR, and dated 02/17/2010 has revealed that there are 4 RCRA-NonGen sites within approximately 0.25 miles of the target property.

EXECUTIVE SUMMARY

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

An online review and analysis by NUTSHELL LTD of the Manufactured Gas Plants list, as provided by EDR, has revealed that there is 1 Manufactured Gas Plants site within approximately 1 mile of the target property.

Environmental Interest/Information System

NCDB (National Compliance Data Base) supports implementation of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) and the Toxic Substances Control Act (TSCA). The system tracks inspections in regions and states with cooperative agreements, enforcement actions, and settlements.

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

US EPA TRIS (Toxics Release Inventory System) contains information from facilities on the amounts of over 300 listed toxic chemicals that these facilities release directly to air, water, land, or that are transported off-site.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Date form received by agency: 03/02/1992
Facility name: HILLS CHEVRON
Classification: Conditionally Exempt Small Quantity Generator

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D006
Waste name: CADMIUM

Waste code: D007
Waste name: CHROMIUM

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Violation Status: No violations found

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Waste code: D018
Waste name: BENZENE

Waste code: D039
Waste name: TETRACHLOROETHYLENE

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Handler Activities Summary:

U.S. importer of hazardous waste: No
Mixed waste (haz. and radioactive): No
Recycler of hazardous waste: No
Transporter of hazardous waste: No
Treater, storer or disposer of HW: No
Underground injection activity: No
On-site burner exemption: No
Furnace exemption: No
Used oil fuel burner: No
Used oil processor: No
Used oil refiner: No
Used oil fuel marketer to burner: No
Used oil Specification marketer: No
Used oil transfer facility: No
Used oil transporter: No
Off-site waste receiver: Commercial status unknown

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

SHWS: This state does not maintain a SHWS list. See the Federal CERCLIS list and Federal NPL list.

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

State and tribal Brownfields sites

BROWNFIELDS: Brownfields Sites Listing

Brownfields are abandoned, idle or underused commercial or industrial properties, where the expansion or redevelopment is hindered by real or perceived contamination. Brownfields vary in size, location, age, and past use -- they can be anything from a five-hundred acre automobile assembly plant to a small, abandoned corner gas station.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

SSTS: Section 7 Tracking Systems

Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General WSW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

| <u>MAP ID</u> | <u>LOCATION FROM TP</u> | <u>GENERAL DIRECTION GROUNDWATER FLOW</u> |
|---------------|-----------------------------|---|
| Not Reported | | |

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Paleozoic
System: Cambrian
Series: Cambrian
Code: C (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: HAGERSTOWN

Soil Surface Texture: silt loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained. Soils have intermediate water holding capacity. Depth to water table is more than 6 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 80 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|--------------------|--|---|---------------------------|------------------------|
| | Boundary | | | Classification | | | |
| Layer | Upper | Lower | Soil Texture Class | AASHTO Group | Unified Soil | Permeability Rate (in/hr) | Soil Reaction (pH) |
| 1 | 0 inches | 8 inches | silt loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 6.00 Min: 0.60 | Max: 6.50 Min: 4.50 |
| 2 | 8 inches | 20 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay | Max: 2.00 Min: 0.60 | Max: 7.30 Min: 4.50 |
| 3 | 20 inches | 72 inches | clay | Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit 50% or more), Fat Clay. | Max: 2.00 Min: 0.60 | Max: 7.30 Min: 5.10 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinate soil types may appear within the general area of target property.

Soil Surface Textures: silty clay loam

Surficial Soil Types: silty clay loam

Shallow Soil Types: silt loam

Deeper Soil Types: channery - silt loam
stratified loam
unweathered bedrock

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

West Virginia Water Well Information

RADON

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

EPA Region 3 Statistical Summary Readings

Source: Region 3 EPA

Telephone: 215-814-2082

EPA Region 3 implements and enforces the RCRA corrective action program for Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia

Site Address:

KIDDE FIRE FIGHTING
 2 EXECUTIVE WAY
 RANSON, WV 25438
 County: JEFFERSON

US Congressional District: N/A
 Population within 1 mile: 5342

For further information on this corrective action site, contact region or state in which this site is located.

Cleanup Progress Summary

Hazardous wastes are managed under the Resource Conservation and Recovery Act. When these wastes contaminate the land, water or air they must undergo "corrective action."

No site status is available at this time.

[View detailed list of cleanup activities >>](#)

[View information on what controls are in place to protect human health and the environment >>](#)

Environmental Impact Summary

If this corrective action site has been examined to determine if human exposures to contaminants are under control and the migration of contaminated water is under control, that information is provided below.

Human Exposure Control

At this site, there is currently insufficient information to determine whether human exposures are under control.

Migration of Contaminated GW Control

At this site, there is currently insufficient information to determine

**whether migration of
contaminated
groundwater is under
control.**

Contamination & Exposure

Contamination:

Information on the contamination and the reason for the cleanup may be available. For further information, see the contact information provided above, or try the [Statement of Basis](#) Web Page to see if a Statement of Basis for the [corrective action](#) remedy has been provided to EPA.

Exposure:

Is [human exposure to contamination](#) at this site under control? UNKNOWN

Is the [migration of contaminated groundwater](#) at this site under control? UNKNOWN

The Solution: Cleanup Process & Progress

Cleanup Activities at this site:

| Action | Date/Status |
|--|-------------|
| 1. Site Assessed | UNKNOWN |
| 2. Site Identified for Corrective Action | NO |
| 3. Solution for Cleanup Selected (Final Remedy Decision) | UNKNOWN |
| 4. Solution for Cleanup is Implemented | UNKNOWN |
| 5. Cleanup Complete | UNKNOWN |

Controls in Place at this site:

There are many types of controls that can be put in place to control [human exposure to contaminants](#) and the [migration of contaminated groundwater](#) from the site, and protect the effectiveness of cleanup remedies. Engineering Controls are mechanisms that work by physically controlling access to the land, the flow of water, etc. Examples include fences, cement caps over contaminated areas, and pumps. Institutional Controls (ICs) (also known as land use controls ([LUCs](#)) [EPA disclaimer](#)), activity and use limitations (AULs), and environmental use restrictions (EURs) are administrative and/or legal controls, that work by limiting land or resource use. Private or (proprietary) examples include deed restrictions, covenants and easements. Public (or governmental) examples include zoning ordinances and groundwater permitting programs.

| Are controls in place at this site? | Type of Control(s): |
|--|---------------------|
| Institutional Controls : UNKNOWN | N/A |
| Engineering Controls : UNKNOWN | N/A |

Government Performance & Results Act (GRPA) Milestones

EPA is required to report on the following milestones under the Government Performance & Results Act. [More Information...](#)

| Milestone | Status |
|---|---------------|
| <u>Human Exposure</u> Under Control | UNKNOWN |
| <u>Contaminated Groundwater migration</u> Under Control | UNKNOWN |

Definitions:

- **Site assessed:** The site has been evaluated to determine if there may have been past or ongoing releases of hazardous waste posing risks to human health and the environment that would require corrective action.
- **Site identified for cleanup:** The site has been identified for cleanup after being investigated to determine the nature and extent of hazardous waste contamination.
- **Solution for Cleanup Selected (Final Remedy Decision):** The State or EPA has formally selected a cleanup remedy designed to meet RCRA Corrective Action long term goals of protecting human health and the environment.
- **Solution for Cleanup is Implemented:** The State or EPA has acknowledged, in writing, that the RCRA site/facility has completed construction of a remedy designed to achieve the long-term protection of human health and the environment.
- **Cleanup Complete:** All the cleanup objectives have been met, media cleanup is final, all the sources of releases are controlled, and full protection of human health and the environment is achieved at this RCRA site/facility. Although hazardous material may still be present at the site, protection of human health and the environment is controlled through institutional or engineering controls over that material.
- **Human Exposure to Contaminants Controlled:** A "yes" indicates that there are no unacceptable human exposures to contamination that can reasonably be expected under current land and groundwater use conditions.
- **Migration of Contaminated Water Controlled:** A "yes" indicates that there is no migration of contaminated groundwater under current conditions. This indicator pertains only to further spread of contaminated groundwater and contaminants in groundwater.
- **Corrective Action:** The many actions that EPA undertakes in addressing the investigation, and remediation of contamination at or from hazardous waste treatment, storage or disposal facilities.
- **Institutional Controls:** Non-engineering controls used to restrict land use or land access in order to protect people and the environment from exposure to hazardous substances remaining in the site/or facility.
- **Engineering Controls:** Engineering measures designed to minimize the potential for human exposure to contamination by either limiting direct contact with contaminated areas or controlling migration of contaminants.

West Virginia Company Settles Chemical Release Reporting Violations

Release date: 11/13/2008

Contact Information: Donna Heron 215-814-5113 / heron.donna@epa.gov

PHILADELPHIA (November 13, 2008) – The U.S. Environmental Protection Agency today announced that Kidde-Fenwal, Inc. has settled alleged violations of federal toxic chemical reporting at two plants located in Ranson, W.Va.

EPA cited the company for violating the Emergency Planning and Community Right-to-Know Act (EPCRA), which requires companies that manufacture, use or process more than a threshold amount of listed toxic chemicals to file an annual "toxic chemical release form" with EPA and the state. Companies must also report both routine and accidental releases of toxic chemicals, as well as the maximum amount of any listed chemicals at the facility and the amount contained in wastes transferred off-site. These reports are used to compile the Toxic Release Inventory, a publicly available EPA database that contains information on toxic chemical releases and waste management activities by certain industries as well as federal facilities. For more information, see <http://www.epa.gov/tri/>

In a consent agreement with EPA, the company has agreed to pay a \$24,923 civil penalty for failing to file required annual reports for lead and copper for the year 2006 for its facilities located at 215 North Mildred St., and 351 West 2nd Ave., in Ranson, W. Va. *NOTE: This case involves alleged reporting violations, and not unlawful releases of toxic chemical.*

The settlement penalty reflects the company's cooperation with EPA's investigation of these alleged violations, and its prompt compliance efforts. As part of the settlement, the company did not admit liability for the alleged violations, but has certified compliance with applicable EPCRA requirements.

Kidde-Fenwal, Inc. ceased operations at its Ranson, W.Va. facilities in 2006.

During FY2008, EPA concluded enforcement actions requiring polluters to spend an estimated \$11 billion on pollution controls, clean-up and environmental projects, an all time record for EPA. After these activities are completed, EPA expects annual pollution reductions of more than three billion pounds.

This is a detailed street map of downtown Charleston, West Virginia, dated October 1907. The map shows a grid of streets including North, George, Liberty, Washington, Charles, and Samuel. Various buildings are depicted with labels such as 'CITY HALL', 'JEREMIAH QUINCY COURT HOUSE', and 'CHARLESTOWN W.V.A.'. The map also shows a river and a bridge. The date 'OCT. 1907' is prominently displayed in the center of the map.
